Directors' report

The Directors have the pleasure of presenting their report together with the audited consolidated financial statements of Union Properties Public Joint Stock Company and its subsidiaries ("the Group") for the year ended 31 December 2017.

Financial results

The Group income for 2017 reached to AED 640 million (2016: AED 962 million) and loss on valuation of properties of AED 2,076 million (2016: gain of AED 173 million) resulting a total loss of AED 1,436 (2016: total income of AED 1,135 million) and the net loss amounted to AED 2,375 million (2016: net profit of AED 211 million).

The Directors propose the following appropriations from retained earnings:

- According to the UAE Federal Law No. (2) of 2015, the Company was note required to transfer any amount to the statutory reserve (2016: AED 21.1 million).
- The equity attributable to the shareholders of the Company as at 31 December 2017 amounted to AED 2,655 million (2016: AED 5,030 million).
- Furthermore, the Directors have resolved to apply the general reserve amounting to AED 313.7 million to partially offset the Group's accumulated losses as at 31 December 2017.

Directors

Independent Auditors' Report

To the Shareholders of Union Properties PJSC

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of Union Properties PJSC ("the Company") and its subsidiaries ("the Group"), which comprise the consolidated statement of financial position as at 31 December 2017, the consolidated statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2017, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the United Arab Emirates, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matters

We draw attention to note 11 to this consolidated financial statements which explains the following:

the effect and reasons for restatement of prior year comparative information; and

Emphasis of matters (continued)

the change in fair value of investment properties by AED 2,076 million as a result of the reduction in the gross floor area and revision to the fair value estimates for MotorCity Project.

Our opinion is not modified in respect of above matters.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Restatement of Comparative Information

Refer to note 11 to the consolidated financial statements.

Key audit matter

During the year ended 31 December 2017, the Group identified a suspected irregularity (the "irregularity") and communicated this to the relevant Regulatory Authority in the UAE. This irregularity was in respect of a transaction, recorded in 2015, which resulted in the recognition of a fair valuation gain on a certain investment property amounting to AED 503 million in the Group's consolidated income statement for the year ended 31 December 2015. New information was brought to our attention by management during the year ended 31 December 2017 which indicated that the Group did not, at the time of the aforementioned transaction, have adequate title and ownership to such investment property.

Given the significance of the matter, the Group appointed a third party external forensic expert to investigate this matter and any further matters arising from the irregularity. The forensic expert completed their investigation and issued a final report on 18 October 2017, which confirmed that the Group did not, at the time of the aforementioned transaction, have adequate title and ownership to this investment property.

As a result, the Group restated its comparative information presented in the 31 December 2017 consolidated financial statements.

How our audit addressed the key audit matter

Our audit procedures included:

we assessed the competence and independence of the forensic expert and the appropriateness of their scope of work.

How our audit addressed the key audit matter (continued)

Our audit procedures included (continued):

- we met the forensic expert appointed by management to review the robustness of the investigation process, the methodology used and discuss the evidence gathered to support their findings.
- we involved our forensic specialist to independently assess the results of the investigation carried out by the forensic expert.
- we assessed the adequacy and appropriateness of the disclosures made in the consolidated financial statements, including the effect of the restatement.

Valuation of Investment Properties

Refer to note 11 to the consolidated financial statements

Key audit matter

The Group's accounting policy is to state its investment properties (primarily comprising plots of land, residential, retail and commercial facilities, labor camps and warehouses) at fair value at each reporting date. The property portfolio is valued at AED 3,719 million as at 31 December 2017. The net fair value loss during the year recorded in the consolidated statement of profit or loss amounted to AED 2,076 million.

The Group engaged professionally qualified external valuers ("valuation expert") to fair value all its properties within its property portfolio. The valuation expert performed their work in accordance with the Royal Institution of Chartered Surveyors ('RICS') Valuation Standards and IFRS 13 "Fair Value Measurement".

In determining the fair values of the investment properties, two valuation approaches were used i.e. income capitalisation approach and market valuation approach, depending on the nature of each investment property and based on the availability of sufficient data.

The valuation of the portfolio is a significant judgment area and is underpinned by a number of significant assumptions. The key inputs into the valuation process were gross floor area as per the updated master community development plan for the MotorCity project as approved by the Board of Directors, discount rates, yield rates, contracted lease rent and forecasted operating expenses, which are influenced by prevailing market forces and the specific characteristics, such as property location, income return, growth rate and occupancy rate of each property in the portfolio. Comparable transactions are also a key input.

Valuation of Investment Properties (continued)

The existence of significant estimation uncertainty warrants specific audit focus in this area as any error in determining the fair value could have a material impact on the value of the Group's investment properties and the fair value gain or loss recognized in respect of these investment properties.

How our audit addressed the key audit matter

Our audit procedures included:

- we assessed the competence and independence of the valuation expert appointed by management and read their terms of engagement to determine whether there were any matters that might have affected their objectivity or may have imposed scope limitations on their work.
- we obtained the external valuation reports for all properties valued by the valuation expert.
- we evaluated the appropriateness of the valuation approach and suitability of the techniques used by the valuation expert for the respective investment property, taking into account the nature of each investment property and availability of sufficient data to maximise the use of observable market inputs. We compared the market rental rates or market prices of the respective investment property to comparable properties in the vicinity, where available.
- we met the valuation expert to discuss the results of their work. We challenged and evaluated the valuation process, overall performance of the portfolio and significant assumptions used in the valuation. Where there was a significant change in the fair valuation compared to the previous year, we discussed and understood the underlying reasons for such a significant change. We involved our internal valuation specialists to independently verify the key estimates and judgements used by the valuation expert.
- we carried out procedures to test, on a sample basis, the completeness and accuracy of property specific inputs provided to the valuation expert by management.
- we assessed the adequacy and appropriateness of the disclosures made in the consolidated financial statements.

Funding, liquidity and commitments

Refer to notes 2, 22, 29 and 32 to the consolidated financial statements.

Key audit matter

The Group's consolidated financial statements have been prepared using the going concern basis of accounting, notwithstanding the fact that the Group has net current liabilities of AED 1,015 million and accumulated losses of AED 1,961 million as at the reporting date. The Group's financial obligations included in the current liabilities are short term loans of AED 592 million to be repaid with next 12 months from the reporting date. The Group has off balance sheet exposure of AED 549 million in the form of letters of guarantee, AED 50 million towards capital commitments, apart from contingent liabilities towards claims and commitments relating to its contracting business.

How our audit addressed the key audit matter

Our audit procedures included:

- we held discussion with management to understand management's plan for the next twelve months from the reporting date to meet the cash flow requirements for the Group.
- we have considered the adequacy of the Group's liquidity position over a period of twelve months from the reporting date by analysing the Group's available funding facilities, forecasted cash flows from operations, disposals of investments, contractual loan maturities, estimated and committed capital expenditure.
- we held discussions with the management on significant claims and commitments and challenged the key estimates and assumptions used for the assessment of potential liquidated damages and forseable losses on contracts, including correspondence with customers regarding claims and outstanding performance guarantees.
- we checked the covenants which the Group should comply with as at the reporting date per the facility letter with the creditor banks.
- we assessed the adequacy and appropriateness of the disclosures made in the consolidated financial statements relating to liquidity risk and commitments.

Valuation of Trade and Contract Receivables

Refer to notes 12, 16 and 31(a) to the consolidated financial statements.

Key audit matter

The Group has significant trade and contract receivables amounting to AED 2,513 million and an impairment provision of AED 1,792 million is recorded for doubtful debts as at 31 December 2017. Determination of the recoverable amount of certain receivables may require judgment to be used for estimating the recoverable amount.

How our audit addressed the key audit matter

Our audit procedures included:

- we assessed controls over the design and implementation and the operating effectiveness of key controls over the credit evaluation, trade receivable collection process and measurement.
- we held discussions with management the status of each of the material trade receivables, particularly those aged over one year.
- we corroborated explanations provided by management with supporting evidence, such as arrangements and/or correspondences with external parties to assess the recoverability of significant and/or long outstanding receivables and past payment history. Based on this we assessed the adequacy and appropriateness of the provisions recorded against receivables by the Group.
- we verified recoveries from overdue debtors subsequent to the year end.
- for legal cases, we obtained the Group's legal advisors' confirmation on the status of pending cases in order to assess the adequacy of provision there against.
- we assessed the adequacy and appropriateness of the disclosures made in the consolidated financial statements.

Contract Revenue Recognition

Refer to note 5 to the consolidated financial statements.

Key audit matter

Contracting segment revenue and profit is recognised in accordance with IAS 11 based on the stage of completion of contracts which is assessed with reference to the proportion of contract costs incurred for the work performed to the statement of financial position date, relative to the estimated total costs of the contract at completion.

The recognition of revenue and profit therefore relies on estimates in relation to the final estimated costs on each contract. Changes to these estimates could give rise to material variances in the amount of revenue and profit / loss recognised. Cost contingencies may also be included in these estimates to take account of specific uncertain risks, or disputed claims against the Group, arising within each contract. These contingencies are reviewed by the Group on a regular basis throughout the contract life and adjusted where appropriate.

Contract Revenue Recognition (continued)

Key audit matter (continued)

Variations and claims, are recognised on a contract-by-contract basis when the customer approval on the same has been obtained by the Group. Therefore, there is a high degree of risk and associated management judgment in: estimating the amount of revenue to be recognised by the Group with respect to the final out-turn on contracts; assessing the level of the contingencies; and recognising receipt of variations and claims.

How our audit addressed the key audit matter

Our audit procedures on contract revenue and margin recognition included:

- an assessment of the design and implementation of key controls over the recognition of revenue and related costs.
- selected a sample of contracts in order to challenge both current and future financial performance. Samples were selected based on a number of quantitative and qualitative factors such as contract value, profitability and duration of contract, as well as other randomly selected contracts.
- for sampled contracts, challenging management's key judgements inherent in the forecast costs to complete that drive the accounting under the percentage of completion method, including the following procedures:
 - a review of the contract terms and conditions through review of contract documentation;
 - testing the existence and valuation of claims and variations both within contract revenue and contract costs via inspection of correspondence with customers and the supply chain;
 - a review of legal and experts' reports received on contentious matters;
 - an assessment of the forecasts through discussion with Group, finance, commercial and operational management;
 - an assessment of the ability to deliver contracts within budgeted timescales and any exposures to liquidated damages for late delivery of contract works;
 - a review of post-balance sheet contract performance to support year end judgments; and
 - for contracts completed during the year, we assessed the accuracy of the estimation process by comparing actual profitability with the estimated profits.

Other Information

Management is responsible for the other information. The other information comprises the Directors' report which we obtained prior to the date of this auditors' report, and the Annual Corporate Governance Report, which is expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the Annual Corporate Governance Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take appropriate actions in accordance with ISAs.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and their preparation in compliance with the applicable provisions of the UAE Federal Law No. (2) of 2015, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements (continued)

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Further, as required by the UAE Federal Law No. (2) of 2015, we report that:

- i) we have obtained all the information and explanations we considered necessary for the purposes of our audit;
- ii) the consolidated financial statements have been prepared and comply, in all material respects, with the applicable provisions of the UAE Federal Law No. (2) of 2015;
- iii) the Group has maintained proper books of account;

Report on Other Legal and Regulatory Requirements (continued)

- iv) the financial information included in the Directors' report, in so far as it relates to these consolidated financial statements, is consistent with the books of account of the Group;
- v) as disclosed in note 13 to the consolidated financial statements, the Group has purchased shares during the year ended 31 December 2017;
- vi) note 17 to the consolidated financial statements discloses material related party transactions and the terms under which they were conducted; and
- vii) based on the information that has been made available to us, nothing has come to our attention which causes us to believe that the Group has contravened during the financial year ended 31 December 2017 any of the applicable provisions of the UAE Federal Law No. (2) of 2015 or in respect of the Company, its Articles of Association, which would materially affect its activities or its consolidated financial position as at 31 December 2017.
- viii) note 35 to the consolidated financial statements discloses the social contributions made during the year.

Notes

(forming part of the consolidated financial statements)

1 Legal status and principal activities

Union Properties Public Joint Stock Company ("the Company") was incorporated on 28 October 1993 as a public joint stock company by a United Arab Emirates Ministerial decree. The Company's registered office address is P.O. Box 24649, Dubai, United Arab Emirates ("UAE").

The principal activities of the Company are investment in and development of properties, the management and maintenance of its own properties including the operation of cold stores, the undertaking of property related services on behalf of other parties (including related parties) and acting as the holding company of its subsidiaries and investing in an associate and joint venture as set out in note 2.1.

The Company and its subsidiaries are collectively referred to as "the Group". All of the Group's significant business and investment activities in land, properties and securities are carried out within the UAE. The Group does not have any foreign exposure towards land and properties but have exposure towards its investments in securities.

2 Basis of preparation

2.1 Basis of consolidation

These consolidated financial statements comprise a consolidation of the financial statements of the Company and its subsidiaries on a line-by-line basis, as set out below:

Entity	Incorporated in	Effective ownership	Principal activities
Subsidiaries		р	- · · · · · · · · · · · · · · · · · · ·
Thermo LLC	UAE	100%	Contracting of mechanical, electrical, and plumbing works of building projects, facilities management services.
Gulf Mechanical A/C Acoustic Manufacturing (GMAMCO) LLC	UAE	100%	Central air-conditioning, requisites manufacturing, fire fighting equipment assembling.
Gmamco Trading LLC	UAE	100%	Fire fighting & safety equipment trading, air condition trading, pumps, engines, valves & spare parts trading, water heaters trading, lighting equipment requisites trading.
Gmamco Saudi LLC	KSA	100%	Central air-conditioning, requisites manufacturing, fire fighting equipment assembling.
ServeU LLC	UAE	100%	Facilities management, security, mechanical, electrical and plumbing works and energy management services.
EDARA LLC	UAE	100%	Project management services.

Notes (continued)

2 Basis of preparation (continued)

2.1 Basis of consolidation (continued)

Entity	Incorporated in		Principal activities
Subsidiaries Dubai Autodrome LLC	UAE	100%	Building, management and consultancy for all types of race tracks and related developments for all types of motor racing.
The Fitout LLC	UAE	100%	Manufacturing and interior decoration.
Thermo Saudi LLC	KSA	100%	Contracting of mechanical, electrical, and plumbing works of building projects, facilities management services.
Thermo OPC	Qatar	100%	Contracting of mechanical, electrical and plumbing works of building projects and facilities management services.

Emirates District Cooling LLC	UAE	50%	Constructing, installing and operating cooling and conditioning systems.

Notes (continued)

2 Basis of preparation (continued)

2.1 Basis of consolidation (continued)

(a) Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

(b) Associates and joint ventures

Associates are those entities in which the Group has significant influence, but not control or joint control, over the financial and operating policies. A joint venture is an arrangement in which the Group has joint control, whereby the Group has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

Interests in associates and the joint ventures are accounted for using the equity method. They are initially recognised at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Group's share of the profit or loss and other comprehensive income of equity-accounted investees, until the date on which significant influence or joint control ceases.

(c) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in full in preparing these consolidated financial statements. Unrealised gains arising from transactions with an associate and joint venture are eliminated to the extent of the Group's interest in the associates and joint ventures. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

2.2 Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with the International Financial Reporting Standards ("IFRS") and the requirements of the UAE Federal Law No. (2) of 2015.

2.3 Basis of measurement

The consolidated financial statements of the Group have been prepared on the historical cost convention basis except for investment properties and other investments which are stated at fair values.

2.4 Functional and presentation currency

The consolidated financial statements are presented in United Arab Emirates Dirhams ("AED"), which is the Group's functional currency. All amounts have been rounded to the nearest thousand, unless otherwise indicated.

Notes (continued)

2 Basis of preparation (continued)

2.5 Use of estimates and judgements

In preparing these consolidated financial statements, management has made judgements, estimates and assumptions that affect the application of the Group's accounting policies and the reported amounts of assets, liabilities, income and expenses.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated financial statements are described in note 32.

2.6 Fair Value Measurement

A number of the Group's accounting policies and disclosures require the determination of fair values, for both financial and non-financial assets and liabilities.

The Group has an established control framework with respect to the measurement of fair values. This includes a management team that has overall responsibility for oversecing all significant fair value measurements, including Level 3 fair values. The management team regularly reviews significant unobservable inputs and valuation adjustments.

If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

Significant valuation issues are reported to the Group's Audit Committee.

When measuring the fair value of an asset or liability, the Group uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in valuation techniques as follows.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or liability might be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Notes (continued)

2 Basis of preparation (continued)

2.7 Financial Commitments

The Group's loans and borrowings as at 31 December 2017 amounted to AED 1,562 million (AED 1,510 million of long-term bank loans and AED 51 million of short-term bank borrowings). Furthermore, the Group has net current liabilities of AED 618 million as at the reporting date. Moreover, as at the reporting date, the Group has to repay AED 245 million (AED 194 million current portion of long-term loans and AED 51 million of short-term bank borrowings) within the next 12 months.

The management have analysed the Group's liquidity position over a period of 12 months from the reporting date. Based on the Group's available funding facilities, forecasted cash inflows from operations, contractual loan maturities, debt service costs, estimated and committed capital expenditure, management has not identified a material uncertainty that may cast significant doubt about the Group's ability to continue as a going concern or to meet its future obligations.

The Board of Directors have reviewed the Group's cash flow projections and have concluded that the Group will be able to meet its commitments as they fall due in the foreseeable future.

3 Significant accounting policies

The following accounting policies, which comply with IFRS, have been applied consistently in dealing with items that are considered material in relation to the Group's consolidated financial statements:

Revenue

Revenue comprises amounts derived from the letting of investment properties, proceeds from sale of real estate properties (including sale of plots of land), contract revenue and amounts invoiced to third parties for the sale of goods and services falling within the Group's ordinary activities, after deduction of trade discounts given in the ordinary course of business.

Revenue recognition

Goods sold and services rendered

Revenue from sale of goods is recognised when the significant risks and rewards of ownership have been transferred to the customer. Revenue from services rendered is recognised in proportion to the stage of completion of the transaction at the reporting date. The stage of completion is assessed by reference to the surveys of work performed. No revenue is recognised if there are significant uncertainties regarding recovery of the consideration due, associated costs or the possible return of goods.

Revenue from sale of properties on a freehold basis or under finance lease is recognised when the significant risks and rewards of ownership are transferred to the buyer. Significant risks and rewards of ownership are deemed to be transferred to the buyer when the associated price risk is transferred to the buyer upon signing of the contract agreement and the buyer has been granted access to the property.

Notes (continued)

3 Significant accounting policies (continued)

Revenue recognition (continued)

Contracting

Contract revenue includes the initial amount agreed in the contract plus any variations in contract work, claims and incentive payments to the extent that it is probable that they will result in revenue and can be measured reliably. If the outcome of a construction contract can be estimated reliably, then contract revenue is recognised in the profit or loss in proportion to the stage of completion of the contract.

The stage of completion is assessed by reference to surveys of work performed. Otherwise, contract revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable.

Contract expenses are recognised as incurred unless they create an asset related to future contract activity. An expected loss on a contract is recognised immediately in profit or loss.

Rental income

Rental income from investment properties is recognised as revenue on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over term of the lease.

Finance income and expense

Finance income comprises interest income on fixed deposits and changes in the fair value of financial assets at fair value through profit or loss. Interest income is recognised as it accrues in the profit or loss using the effective interest method.

Finance expense comprises interest expense on bank borrowings, changes in the fair value of financial assets at fair value through profit or loss and impairment losses recognised on financial assets. All borrowing costs, except to the extent that they are capitalised in accordance with the paragraph below, are recognised in the profit or loss using the effective interest method.

Borrowing costs directly attributable to the acquisition or construction of qualifying asset are capitalised as part of the cost of that asset. The capitalisation of borrowing costs commences from the date of incurring of expenditure related to the asset and ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use is complete. Borrowing costs relating to the period after acquisition or construction are expensed.

Intangible assets

Goodwill

The excess of the cost of acquisition over the Group's interest in the fair value of the identifiable assets and liabilities of a subsidiaries, joint ventures and associates at the date of acquisition is recorded as goodwill. Goodwill attributable to investment in associates and joint ventures is included as part of the carrying value of investment. Goodwill attributable to subsidiaries is disclosed as goodwill in the consolidated statement of financial position.

Goodwill is tested annually for impairment and is carried at cost less accumulated impairment losses. The impairment test for goodwill is based on the revocable amount of the cash generating unit to which the goodwill relates. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Union Properties Public Joint Stock Company and its subsidiaries Notes (continued)

3 Significant accounting policies (continued)

Property, plant and equipment and depreciation

Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation (refer below) and accumulated impairment losses (refer accounting policy on impairment), if any. Cost includes expenditure that is directly attributable to the acquisition of the asset. When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. The cost of self constructed assets includes the cost of materials, direct labour and an appropriate proportion of overheads.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

Depreciation

Depreciation is recognised in the profit or loss on a straight-line basis over the estimated useful life of each part of an item of property, plant and equipment. Land is not depreciated. The estimated useful lives for the current and comparative periods are as follows:

Assets	Number of years	Rate (%)
Buildings and leasehold improvements	3 to 20	5 to 33
Plant and machinery	5 to 10	10 to 20
Furniture, fixtures and office equipments	2 to 4	25 to 50
Motor vehicles	4	25
Gymnasium equipments	5	20
Equipment and tools	2 to 3	33 to 50
	====	

The depreciation method, useful lives and residual values are reassessed at the reporting date.

Capital work-in-progress

Capital work-in-progress is stated at cost less accumulated impairment losses (refer accounting policy on impairment), if any, until the construction is complete. Upon completion of construction, the cost of such asset together with the cost directly attributable to construction (including borrowing costs and land rent capitalised) are transferred to the respective class of assets. No depreciation is charged on capital work-in-progress.

Transfers from property, plant and equipment

Certain items of property, plant and equipment are transferred from property, plant and equipment to investment properties or vice-versa at fair value, which becomes its deemed cost for subsequent accounting, following a change in use of that item. Subsequent to initial measurement, such properties are measured in accordance with the measurement policy for property, plant and equipment or investment properties.

Notes (continued)

3 Significant accounting policies (continued)

Investment properties

Recognition

Land and buildings owned by the Group for the purposes of generating rental income or capital appreciation or both are classified as investment properties. Properties that are being constructed or developed for future use as investment properties are also classified as investment properties. Where the Group provides ancillary services to the occupants of a property, it treats such a property as an investment property if the services are a relatively insignificant component of the arrangement as a whole.

When the Group begins to redevelop an existing investment property for continued future use as an investment property, the property remains as an investment property, which is measured based on fair value model and is not reclassified as development property during the redevelopment with respect to as an investment property.

Measurement

Investment properties are initially measured at cost, including related transaction costs. Subsequent to initial recognition, investment properties are accounted for using the fair value model under International Accounting Standard No. 40. Any gain or loss arising from a change in fair value is recognised in the profit or loss.

Where the fair value of an investment property under development is not reliably determinable, such property is measured at cost until the earlier of the date construction is completed and the date at which fair value becomes reliably measurable.

Property interest under an operating lease

A property interest under an operating lease is classified and accounted for as an investment property on a property by property basis when the Group holds it to earn rentals or for capital appreciation or both. Any such property interest under an operating lease classified as an investment property is carried at fair value. Lease payments are accounted for as described in accounting policy for lease payments.

Transfer from inventory to investment properties

Certain properties held for sale under inventory are transferred from inventory to investment properties when those properties are either released for rental or for capital appreciation or both. The properties held for sale under inventory are transferred to investment properties at fair value on the date of transfer which becomes its deemed cost for subsequent accounting. Subsequent to initial measurement, such properties are valued at fair value in accordance with the measurement policy for investment properties.

Sale of investment properties

Certain investment properties are sold in the ordinary course of business. No revenue and direct costs are recognised for sale of investment properties. Any gain or loss on sale of investment properties (calculated as the difference between the net proceeds from disposal and carrying amount) is recognised in the profit or loss.

Notes (continued)

3 Significant accounting policies (continued)

Financial instruments

Non-derivative financial instruments

Non-derivative financial instruments comprise non-current receivables, other investments, trade and other receivables, amounts due from related parties, cash in hand and at bank, trade and other payables, security deposits, amounts due to related parties, short-term bank borrowings, long-term and short term bank loans and non-current payables.

A financial instrument is recognised if the Group becomes a party to the contractual provisions of the instrument. Financial assets are derecognised if the Group's contractual rights to the cash flows from the financial assets expire or if the Group transfers the financial asset to another party without retaining control or substantially all risks and rewards of the asset. Financial liabilities are derecognised if the Group's obligations specified in the contract expire or are discharged or cancelled.

Non-derivative financial instruments are recognised initially at fair value. Subsequent to initial recognition, non-derivative financial instruments are measured as described below:

Investments at fair value through profit or loss

An instrument is classified as at fair value through profit or loss if it is held for trading or is designated as such upon initial recognition. Financial instruments are designated at fair value through profit or loss if the Group manages such investments and makes purchase and sale decisions based on their fair value. Upon initial recognition, attributable transaction costs are recognised in profit or loss when incurred. Financial instruments at fair value through profit or loss are measured at fair value and changes therein are recognised in the profit or loss. The fair value of quoted securities is determined by reference to their quoted bid prices as at the reporting date.

Others

Other non-derivative financial instruments are measured at amortised cost using the effective interest method less impairment losses, if any.

Cash and cash equivalents

Cash and cash equivalents comprise cash in hand and at bank in current and deposit accounts (having a maturity of three months or less and excluding deposits held under lien). Bank overdrafts that are repayable on demand and bills discounted having a maturity of three months or less form an integral part of the Group's cash management and are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

Derivative financial instruments

The Group uses derivative financial instruments to hedge its exposure to interest rate risk arising from financing activities.

Derivative financial instruments are recognised initially at fair value. Subsequent to initial recognition, derivative financial instruments are recognised at fair value. Recognition of any resultant gain or loss depends on the nature of the item being hedged.

Where a derivative financial instrument is designated as a hedge of the variability in cash flows of a recognised liability, a firm commitment or a highly probable forecasted transaction, the effective part of any gain or loss on the derivative financial instrument is recognised directly in the other comprehensive income. The ineffective part of any gain or loss is recognised in the profit or loss immediately. Any gain or loss arising from change in the time value of the derivative financial instrument is excluded from the measurement of hedge effectiveness and is recognised in the profit or loss immediately.

Notes (continued)

3 Significant accounting policies (continued)

Impairment

Financial asset

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset. An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Impairment losses, if any, are recognised in the profit or loss.

An impairment loss is reversed if the reversal can be related objectively to an asset occurring after the impairment loss was recognised. For financial assets measured at amortised cost, the reversal is recognised in the profit or loss.

Non-financial asset

The carrying amounts of the Group's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses, if any, are recognised in the profit or loss.

A cash generating unit is the smallest identifiable asset group that generates cash flows that are largely independent from other assets and groups.

Inventories

Inventories are valued at the lower of cost and net realisable value.

Properties held for sale

Properties held for sale are classified as inventories and stated at the lower of cost and net realisable value. Cost includes the aggregate cost of development, borrowing costs capitalised and other direct expenses. Net realisable value is estimated by the management, taking into account the expected price which can be ultimately achieved, based on prevailing market conditions.

The amount of any write down of properties under development for sale is recognised as an expense in the period the write down or loss occurs. The amount of any reversal of any write down arising from an increase in net realisable value is recognised in profit or loss in the period in which the increase occurs.

Other inventories

The cost of other inventories is based on the first-in-first-out method and includes expenditure incurred in acquiring inventories and bringing them to their existing location and condition. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and selling expenses.

Contract work-in-progress/billings in excess of valuations

Contract work-in-progress is stated at contract costs plus estimated attributable profits less foreseeable losses and progress billings. Cost includes all expenditure directly related to specific projects and an allocation of fixed and variable overheads incurred in the Group's contractual activities based on normal operating capacity. For contracts where progress billings exceed the contract revenue, the excess is included in current liabilities as billings in excess of valuation.

Notes (continued)

3 Significant accounting policies (continued)

Provision

A provision is recognised in the consolidated statement of financial position when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provision for contract maintenance

Provision for contract maintenance is recognised when the underlying contract enters the maintenance period. The provision is made on a case-by-case basis for each job where the maintenance period has commenced and is based on historical maintenance cost data and an assessment of all possible outcomes against their associated probabilities.

Operating lease payments

Leases of assets under which the lessor effectively retains all the risks and rewards of ownership are classified as operating leases. Payments made under operating leases are recognised in the profit or loss on a straight-line basis over the term of the lease. Lease incentives allowed by the lessor are recognised in the profit or loss as an integral part of the total lease payments made.

Foreign currency transactions

Transactions denominated in foreign currencies are initially recorded in the functional currency by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency using the closing rate. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the reporting period. All foreign currency differences are recognised in the profit or loss.

Earnings per share

The Group presents basic and diluted earnings per share ("EPS") data for its ordinary shares. Basic earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the period. Diluted earnings per share is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

Segment reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. The results of the operating segments are reviewed regularly by the Board of Directors to make decisions about resources to be allocated to the segment and to assess its performance, and for which discrete financial information is available.

Segment results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

Segment capital expenditure is the total cost incurred during the year to acquire property, plant and equipment, costs incurred for purchase of investment properties or redevelopment of existing investment properties and costs incurred towards development of properties which are either intended to be sold or transferred to investment properties.

Notes (continued)

3 Significant accounting policies (continued)

New standards and interpretations not yet effective

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2018 with earlier application permitted. The Group does not plan to adopt these standards early. The new standards which may be relevant to the Group are set out below.

IFRS 9 Financial Instruments

IFRS 9 Financial Instruments sets out requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items including a new expected credit loss model for calculating impairment of financial assets, and new general hedge accounting requirements. This standard replaces IAS 39 Financial Instruments: Recognition and Measurement. The final version of IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted.

i. Classification – financial assets

IFRS 9 contains a new classification and measurement approach for financial assets that reflects the business model in which assets are managed and their cash flow characteristics. IFRS 9 contains three principal classification categories for financial assets: measured at amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL). The standard eliminates the existing IAS 39 categories of held to maturity, loans and receivables and available for sale.

Based on its assessment, the Group does not believe that the new classification requirements will have a material impact on its accounting for financial assets

ii. Impairment

IFRS 9 replaces the 'incurred loss' model in IAS 39 with a forward-looking 'expected credit loss' (ECL) model. This will require considerable judgement about how changes in economic factors affect ECLs, which will be determined on a probability-weighted basis. The new impairment model will apply to financial assets measured at amortised cost or FVOCI, except for investments in equity instruments, and to contract assets.

Under IFRS 9, loss allowances will be measured on either of the following bases:

- 12-month ECLs: these are ECLs which result from possible default events within the 12 months after the reporting date; and
- Lifetime ECLs: these are ECLs which result from all possible default events over the expected life of a financial instrument.

Lifetime ECL measurement applies if the credit risk of a financial asset at the reporting date has increased significantly since initial recognition and 12-month ECL measurement applies if it has not. An entity may determine that a financial asset's credit risk has not increased significantly if the asset has low credit risk at the reporting date. However, lifetime ECL measurement always applies for trade receivables and contract assets without a significant financing component; the Group has a choice to also apply this policy for trade receivables and contract assets with a significant financing component.

The estimated ECL will be calculated based on actual credit loss experience. The Group will perform the calculation of ECL rates separately for different types of customers including related parties.

Notes (continued)

3 Significant accounting policies (continued)

New standards and interpretations not yet effective (continued)

IFRS 9 Financial Instruments (continued)

ii. Impairment (continued)

Actual credit losses will be adjusted to reflect differences between economic conditions during the period over which the historical data will be collected, prevalent conditions and the Group's view of economic conditions over the expected lives of the receivables and related party balances.

Based on its assessment, the Company does not believe that the application of IFRS 9's impairment requirements as at 1 January 2018 will have a material impact on its financial statements.

IFRS 15 Revenue from Contracts with Customers

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognized. It replaces existing revenue recognition guidance, including IAS 18 Revenue, IAS 11 Construction Contracts and IFRIC 13 Customer Loyalty Programmes. IFRS 15 is effective for annual reporting periods beginning on or after 1 January 2018, with early adoption permitted.

i. Sales of goods

Under IFRS 15, revenue will be recognised when a customer obtains control of the goods.

Revenue will be recognised for the contracts to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognised will not occur. As a consequence, for those contracts for which the Group is unable to make a reasonable estimate of return, revenue is expected to be recognised sooner than when the return period lapses or a reasonable estimate can be made.

Based on the Group's assessment, the timing of revenue recognition from sale of goods are broadly similar. Therefore, the Group does not expect the application of IFRS 15 to result in significant differences in the timing of revenue recognition for these sales.

ii. Rendering of services

Under IFRS 15, the total consideration in the service contracts will be allocated to all services based on their stand-alone selling prices. The stand-alone selling prices will be determined based on the list prices at which the Group sells the services in separate transactions.

Based on the Group's assessment, the fair value and the stand-alone selling prices of the services are broadly similar. Therefore, the Group does not expect the application of IFRS 15 to result in significant differences in the timing of revenue recognition for these services.

Notes (continued)

3 Significant accounting policies (continued)

New standards and interpretations not yet effective (continued)

IFRS 15 Revenue from Contracts with Customers (continued)

iii. Construction contracts

Contract revenue currently includes the initial amount agreed in the contract plus any variations in contract work, claims and incentive payments, to the extent that it is probable that they will result in revenue and can be measured reliably. When a claim or variation is recognised, the measure of contract progress or contract price is revised and the cumulative contract position is reassessed at each reporting date.

Under IFRS 15, claims and variations will be included in the contract accounting when they are approved.

Based on the Group's assessment, the timing of revenue recognition from construction contract are broadly similar. Therefore, the Group does not expect the application of IFRS 15 to result in significant differences in the timing of revenue recognition for these sales.

The Group does not expect the application of IFRS 9 and IFRS 15 to have a significant impact on its consolidated financial statements. The actual impacts of adopting these standards at 1 January 2018 may change because:

- these standards will require the Group to revise its accounting policies and internal controls and these changes are not yet complete;
- the Group is also refining and finalizing its model for expected credit loss calculations; and
- the new accounting policies, assumptions, judgement and estimation techniques employed are subject to change until the Group finalizes its first consolidated financial statements that includes the date of initial application.

IFRS 16 Leases

IFRS 16, published in January 2016 replaces the previous guidance in IAS 17 Leases. Under this revised guidance, leases will be brought onto companies' balance sheets, increasing the visibility of their assets and liabilities. It further removes the classification of leases as either operating leases or finance leases treating all leases as finance leases from the perspective of the lessee, thereby eliminating the requirement for a lease classification test. The revised guidance has an increased focus on who controls the asset and may change which contracts are leases. IFRS 16 is effective for annual periods beginning on or after 1 January 2019.

Management is currently in the process of assessing the impact of IFRS 16 to the accounting, disclosures and presentation requirement in the financial statement.

Notes (continued)

3 Significant accounting policies (continued)

New standards and interpretations not yet effective (continued)

Other new or amended standards

The following new or amended standards are not expected to have a significant impact of the Group's consolidated financial statements:

- Transfers of Investment Property (Amendments to IAS 40) (effective for annual periods beginning on or after 1 January 2018).
- Annual Improvements to IFRSs 2014-2016 Cycle various standards (amendments to IFRS 1 and IAS 28) (effective for annual periods beginning on or after 1 January 2018).
- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28)

The following amendments that are mandatorily effective from the current year:

- Annual Improvements to IFRSs 2014-2016 Cycle (various standard) (Amendments to IFRS 12)
- Recognition of Deferred Tax Assets for Unrealized Losses (Amendments to IAS 12)
- Disclosure Initiative (Amendment to IAS 7)

Application of these standards and amendments would not have a significant impact on the Group's consolidated financial statements as at 31 December 2017.

4 Financial risk management and capital management

Overview

The Group has exposure to the following risks from its use of financial instruments:

- Credit risk;
- · Liquidity risk; and
- Market risk,

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Furthermore, quantitative disclosures are included throughout these consolidated financial statements.

The Board of Directors' have an overall responsibility for the establishment and oversight of the Group's risk management framework. The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the products offered.

Notes (continued)

4 Financial risk management and capital management

Overview (continued)

(a) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or a counterparty to a financial instrument fails to meet its contractual obligations. Credit risk is mainly attributable to trade and other receivables (including non-current receivables), other investments, amounts due from related parties and cash at bank. The exposure to credit risk on trade and other receivables and amounts due from related parties is monitored on an ongoing basis by the management and these are considered recoverable by the Group's management. The Group's cash is placed with banks of good repute.

The Group limits its exposure to investment in unquoted securities by investing in securities where counterparties have credible market reputation. The Group's management does not expect any counterparty to fail.

Real estate property sales

For real estate property sales for general public, the credit risk for the Group is minimised by the fact that the Group receives advances from buyers towards these sales and balance amount due becomes receivable upon handover of the property. However, the Group faces significant credit risk on real estate property sales to corporate or even individual customers (especially on land sales) as the Group provides credit terms to such customers. In order to mitigate the credit risk, the Group receives post dated cheques and does not transfer the legal title of the property to the customer until the full amount has been paid. Furthermore, the risk of financial loss to the Group on account of customer default is low as the property title acts as collateral.

Contracting

For construction contracts, generally the customer to the Group is the main contractor on the job. Furthermore, often the payment terms for these contracts are back-to-back. Thus, the Group can be affected not just by the default risk of the main contractor but also of the ultimate client of the project. The Board of Directors' constantly review and assess the credit as well as business risk of having such a significant exposure to a single customer.

Allowance for impairment

The Group establishes a provision for impairment that represents its estimate of incurred losses in respect of trade and contract receivables. The main component of this provision is a specific loss component that relates to individually significant exposures and a collective loss component established for groups of similar assets in respect of losses that have been incurred but not yet identified.

Guarantees

The Group's policy is to provide corporate guarantees only on behalf of wholly-owned subsidiaries or joint ventures, however, only to the extent of their share of equity in the investee companies. For details of corporate guarantees given by the Group on behalf of the joint ventures, refer note 29.

Notes (continued)

4 Financial risk management and capital management (continued)

Overview (continued)

(b) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk relates to trade and other payables (including non-current payables), security deposits, amounts due to related parties, short-term bank borrowings, and long-term bank loans. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

(c) Market risk

Market risk is the risk resulting from changes in market prices, such as interest rates and equity prices, that will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Equity risk

The Group buys and sells certain marketable securities. The Group's management monitor the mix of securities in investment portfolio based on market expectations and these dealings in marketable securities are approved by the Board of Directors.

Interest rate risk

The interest rate on the Group's financial instruments is based on normal commercial rates. In order to mitigate the movement in interest rates, the Group has entered into interest rate swap contracts on certain long-term bank loans.

Currency risk

Currency risk faced by the Group is minimal as there are minimal foreign currency transactions.

(d) Capital management

The Board of Director's policy is to maintain a strong capital base so as to maintain creditors, customers and market confidence and to sustain future development of the business. The Board of Directors' would monitor the return on capital and level of dividends based upon profits earned by the Group during the year.

There were no changes in the Group's approach to capital management during the year. Except for complying with certain provisions of the UAE Federal Law No. (2) of 2015, the Company is not subject to any externally imposed capital requirements.

		7111777777	***************************************	
	Gross profit/(loss)	(58,989)	12,164	(46,825)

The direct costs include staff costs amounting to AED 144.5 million (2016: AED 204.4 million) and depreciation amounting to AED 6.1 million (2016: AED 6.2 million).

Provision against the contracting business

Thermo LLC a subsidiary of the Company, faced significant issues and is still facing them through their current business of MEP work. During the previous year, the Group had recorded significant provisions on contracts, however, during the year, the Company's Board of Directors have decided to down size Thermo LLC to a closure level. As claims which were not recognised in the books are still arising, the Company's Board of Directors with the assistance from independent lawyers continues to review and assess the risk associated with the Group's contracting business. Accordingly, based on the historical claims arising, management have recorded provision amounting to AED 95 million against the work in progress and on certain contract and retention receivables. In addition, based on the assessment of future claims, which the management is of the view that more likely than not, will come through and the performance bond guarantees against projects will not be retrieved as the final take over certificate is still awaited. Accordingly, a provision of AED 149 million is recorded to mitigate the risk and obligation that may arise against future claims towards the Group's contracting business.

		HESTERATURE	**********
At 31 December	3,718,645	5,595,437	5,566,680

(a) Transfer from inventory

During the previous year, The Board of Directors of the Company has reassessed the use of certain properties held for sale in inventory. Accordingly, properties amounting to AED 2 million have been transferred from inventory to investment properties. As at the reporting date, these properties have been stated at fair values in accordance with the accounting policy adopted by the Group for valuation of investment properties.

(b) Transfer to property, plant and equipment

During the year the Group has not transferred any of their investment properties to property, plant and equipment (2016: transferred investment properties for an amount of AED 66 million).

(c) Sale of investment properties

During the year, the Group has not sold any of their investment properties (2016: sold for AED 234.5 million with a carrying value of AED 186.8 million, resulting in a net gain AED 47.7 million).

(d) Valuation of investment properties

The Group follows the fair value model under IAS 40 (Revised 2003) where investment property defined as land and buildings owned for the purpose of generating rental income or capital appreciation, or both, are fair valued based on an open market valuation carried out by an independent registered valuer, Valustrat Consulting FZCO. The independent valuer provides the fair value of the Group's investment property portfolio every six months. The independent registered valuer had carried out the valuation in accordance with RICS Appraisal and Valuation Manual issued by the Royal Institute of Chartered Surveyors, adopting the IFRS basis of fair value and using established valuation techniques. The independent valuer had reviewed the updated master community development plan for the MotorCity project in forming its view of the fair value of the portfolio as at 31 December 2017.

Notes (continued)

11 Investment properties (continued)

(d) Valuation of investment properties (continued)

The fair values have been determined by taking into consideration the discounted cash flow revenues where the Company has ongoing lease arrangements. In this regard, the Group's current lease arrangements, which are entered into on an arm's length basis and which are comparable to those for similar properties in the same location, have been taken into account.

In cases where the Company does not have any on-going lease arrangements, fair values have been determined, where relevant, having regard to recent market transactions for similar properties as well as taking into account an expected significant increase in the new supply of plots of land in and around the same location as the Group's investment properties. These values are adjusted for differences in key attributes such as property size.

For property under construction, the valuation was determined using residual value approach incorporating a combination of both the income and cost approaches. The market value estimate of these properties is on the assumption that the properties are complete as at the date of valuation, and from which appropriate deductions are made for the costs to complete the project in order to estimate the value of the property in its present condition.

Considering the expected significant increase in the new supply of plots of land in and around the land bank of the Company together with the already existing undeveloped plots of land in existing communities, the independent valuers and management believe this is resulting in increased competition and downward pricing pressures particularly for plots of land. Furthermore, increased property developments in and around the land bank of the Group that are being completed for delivery in the end user property market have resulted into more competition and reduced prices for developed properties as well as land prices. As a result, development margin risks are believed to be increasing when purchasing land as compared to 2016. These factors have resulted in a lower fair value of the Group's land bank. As at 31 December 2017, the independent valuer has determined AED 3,719 million as the fair value of the Group's investment properties.

Accordingly, based on the above valuation, a fair value loss of AED 2,076 million (2016: valuation gain of AED 172.8 million) has been recognised in the consolidated statement of profit or loss for the year ended 31 December 2017. The fair value loss of AED 2,076 million includes AED 690 million of valuation loss on gross floor area (see details in note 11 (e)) and AED 1,380 million as change in fair value of investment properties.

The Company's Board of Directors have reviewed the assumption and methodology used by the independent registered valuer and in their opinion these assumptions and valuation methodology is appropriate and prudent as at the reporting date.

Any significant movement in the assumptions used for the fair valuation of investment properties would result in significantly lower/higher fair values of those assets.

Notes (continued)

11 Investment properties (continued)

(e) Valuation loss on gross floor area

As at 1 January 2017, the Company had ownership of 14.33 million square feet of gross floor area for development within the MotorCity project. With an expected significant increase in new supply of plots of land in and around the land bank of the Company, during the year ended 31 December 2017, the Company had appointed an independent third party consultant to review and prepare an updated master community development plan for the MotorCity project. Considering the infrastructure and the master community development plan as approved by Dubai Municipality, the independent third party consultant had advised that the Company will likely only be able to utilize only 12 million square feet of gross floor area distributed among residential, retail and commercial on the existing unsold and undeveloped plots of land within the MotorCity project. The independent third party consultant had recommended that in case the Company would like to utilize the extra 2.33 million square feet of gross floor area, the Company would need to consider additional commercial costs as well as the practicality of obtaining the required regulatory approvals in the UAE for developing this extra gross floor area.

As at 31 December 2017, the independent third party consultant and the management continues to believe that the Company will likely only be able to utilize only 12 million square feet of gross floor area distributed among residential, retail and commercial on the existing unsold and undeveloped plots of land within the MotorCity project.

The Company's Board of Directors continues to review the application of highest and best use of its available gross floor area to be applied on the Company's plots of land in the future without forfeiture. The Company's Board of Directors is of the opinion, taking into account the market factors noted above, that the updated master community development plan for the MotorCity project is most likely to yield the highest value and this plan has been approved by the Board of Directors for submission to the regulatory authorities for review and approval. Accordingly, the Company's Board of Directors has confirmed that the 2.33 million of extra gross floor area should continue to be valued at Nil as at 31 December 2017 and have recorded the corresponding fair valuation loss amounting to AED 690 million in the consolidated statement of profit or loss for the year then ended.

The Company's intention is to develop its land bank and while doing so it may require and utilize this extra gross floor area depending on the commercial and practicality of utilizing this extra gross floor area. Furthermore, as at 31 December 2017, the Company is still preparing the documentation for submitting the updated master community development plan for the MotorCity project to Regulatory Authorities for approval. Should this estimates or assumptions change, the actual results may defer.

(f) Restatement in relation to a suspected irregularity and error identified

During the year, the Company's Board of Directors had identified a suspected irregularity and had communicated this to the Regulatory Authorities in UAE. This suspected irregularity was on account of a transaction, where, in 2015, a revaluation gain was recorded on 1.67 million square feet of gross floor area on which the Company did not have adequate title and ownership. The Company had appointed third party external forensic accountant to investigate this matter and any further matters arising from the irregularity.

As at 31 December 2017, the third party external forensic accountant have completed its investigation and have issued a final report on 18 October 2017, which confirms that the Company did not at the time of the aforementioned transaction, have adequate title and ownership to that asset.

Notes (continued)

11 Investment properties (continued)

(f) Restatement in relation to a suspected irregularity and error identified (continued)

The Company's Board of Directors had resolved to correct and restate its comparative information as presented in the 31 December 2017 consolidated financial statements. The impact of this restatement resulted in a reduction in opening retained earnings by AED 503 million and the corresponding reduction in the investment properties. This restatement did not have any cash impact and were all related to the recognition of unrealized revaluation gains.

The Group has certain investment securities which are designated as financial assets at fair value through profit or loss and accounted for at fair value at the reporting date.

(b) Investment in real estate fund carried at fair value

Included in other investments is an investment of AED 4.5 million in a real estate fund. The amount invested represents three capital calls to the extent of 90% of the Group's commitment to invest in the real estate fund. The fair value of the fund as of 31 December 2017 is AED 1.35 million (2016: AED 2.50 million).

(c) Other investments in financial instruments

The Company had invested in various financial instruments held for short term purposes. During the current year, the Company has made additional investment amounting to AED 18.3 million (2016: AED 91.3 million) and sold all of these financial instruments with fair value of AED 190.4 million (2016: AED 30.2 million). (The fair value of these financial instruments as at 31 December 2016 was AED 170.9 million).

Furthermore, during the current year, the Company has purchased 112.8 million shares in Palm Hills Development PJSC, a company based in Egypt and listed on the Egyptian Stock Market and London Stock Exchange.

The Group's exposure to fair value hierarchy related to other investments is disclosed in note 31(d).

(b) Significant terms and conditions of long-term bank loans

- (i) In 2013, the Company had a term loan facility of AED 360 million from a bank, which was fully repayable on 20 January 2014. During the previous years, the repayment term of this term loan facility was extended and then fully paid on 20 July 2014. However, the previous facility was financed with a new Islamic financing facility for the same amount availed from another bank. The new facility is repayable in 25 quarterly instalments commencing on April 2015 and final instalment of AED 140 million due on July 2021. This loan is secured by:
 - a. Registered mortgage of title deed;
 - b. Assignment of insurance policy of a property;
 - c. Assignment of lease proceeds of rental units and
 - d. A security cheque of AED 360 million which can be encashed by the bank in the event of default.

During the previous year, the Group has made an early settlement amounting to AED 40 million against this long-term bank loan. At 31 December 2017, the loan amount outstanding is AED 243.9 million (2016: AED 271.5 million).

Notes (continued)

- 22 Long-term bank loans (continued)
- (b) Significant terms and conditions of long-term bank loans (continued)
- (ii) In 2012, the Group had entered into an agreement with a bank, to obtain a term loan of AED 1,078.2 million which was utilised by the Group to settle the outstanding short-term bank borrowings existed as at that date. This term loan is repayable in 6 equal annual instalments of AED 100 million commencing 30 June 2016 and the last payment amounting to AED 478.2 million payable on 30 June 2022. At 31 December 2017, the long-term bank loan is secured by:
 - a. Corporate guarantee from the Company;
 - b. Assignment of certain contract and retention receivables; and
 - c. Promissory note of AED 1,078.2 million.

During the previous year, the Group has made an early settlement amounting to AED 550 million against this long-term bank loan. At 31 December 2017, the loan amount outstanding is AED 478 million (2016: AED 478 million).

- (iii) On 31 August 2016, the Company entered into an agreement with a bank to obtain a long-term bank loan of AED 19.5 million which carries a commercial interest rate. The loan is repayable on twelve quarterly installments of AED 1.6 million commencing on May 2016. The long-term bank loan is secured by a promissory note and corporate guarantee of the Holding Company. At 31 December 2017, the loan amount outstanding is AED 8.1 million (2016: AED 14.6 million).
- (iv) During the previous year, the Company entered into an agreement with a bank to obtain a long-term bank loan which will be utilised to partially pay other loans of group subsidiary amounting to AED 550 million which carries commercial interest rate. The loan is repayable in 36 quarterly equal installments of AED 15.28 million commencing on September 2016. At 31 December 2017, the loan amount outstanding is AED 458.3 million (2016: AED 519.4 million). This long-term bank loan is secured by:
 - a. Registered mortgage of properties, the value of which should not be less than the agreed rate of the outstanding amount;
 - b. Corporate guarantee of one of the subsidiaries; and
 - c. Assignment of insurance of mortgage properties mentioned in note (a) above.

As at 31 December 2017, the Company had not complied with covenant (a) above; the Company under negotiation with the bank on the overall facility which shall conclude during the first quarter of 2018. Accordingly, an amount of AED 397.2 million have been reclassified to current liabilities as at 31 December 2017.

- (v) During the previous year, the Company entered into an agreement with a bank and obtained a long-term bank loan amounting to AED 290 million for the construction of "Oia", a residential building in Motorctiy, this loan carries commercial interest rate. The loan is repayable in over 12 quarterly equal instalments commencing on September 2019, post the moratorium period. At 31 December 2017, the loan amount outstanding is AED 196 million (2016: AED 80.8 million). This long-term bank loan is secured by:
 - a. Registered mortgage of the lands; and
 - b. Assignment of escrow account of the project and other RERA requirements.
- (vi) During the current year, the Company entered into an agreement with a bank to obtain a term loan amounting to AED 125 million which carries commercial interest rate. The loan is repayable in one instalment equal to the loan value commencing on January 2018 (refer note 34). This bank loan is secured by:
 - a. Registered mortgage of the lands;
 - b. Assignment of lease proceeds of rental units; and
 - c. Negative pledge in respect of the above mentioned properties.

At 31 December	4,289,540	3,971,796

At 31 December 2017, the share capital comprised of ordinary equity shares. All issued shares are fully paid. The holders of ordinary equity shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Company. All shares rank equally with regard to the Company's residual assets.

At 31 December 2017, the authorised share capital for the Company is 7 billion shares.

At the Annual General Assembly held on 26 April 2017, the shareholders approved issuing 8% bonus share as dividends.

25 Reserves

(a) Statutory reserve

According to the UAE Federal Law No. (2) of 2015, 10% of the annual net profit of the Company and its subsidiaries is appropriated to statutory reserve until such reserve equals 50% of the paid-up share capital. Such allocations may be ceased when the statutory reserve equals half of the paid-up share capital of the Company. During the current year, the Company was note required to transfer any amount to the statutory reserve (2016: AED 21.1 million).

(b) General reserve

According to the Articles of Association of the Company, 10% of the annual net profit is appropriated to general reserve. The transfer to general reserve may be suspended at the recommendation of the Board of Directors or when it equals 50% of the paid-up share capital.

During the current year, the Group reversed the general reserve.

According to the Article of Association of the Company, the Board of Directors have resolved to apply the general reserve amounting to AED 313.7 million to partially offset the Group's accumulated losses as at 31 December 2017.

(a) Credit risk

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit risk exposure. The maximum exposure to credit risk at the reporting date was:

		2017	2016
	Note	AED'000	AED'000
Non-current receivables (refer note below)	12	299,259	409,842
Other investments	13	93,250	173,399
Trade and other receivables (refer note below)	16	445,261	364,245
Due from related parties	17	31,223	12,676
Cash at bank	18	129,101	233,857
		******	*********
		998,094	1,194,019

Trade and other receivables (including non-current receivables) include an amount of AED 412 million on sale of property where the legal ownership of the property is retained by the Group as a collateral. At 31 December 2017, the fair value of the properties held as collateral by the Group approximates to AED 525 million.

Impairment losses

The ageing of trade receivables (including non-current receivables) at the reporting date is as under:

	2017		2016	
	Gross	Provision	Gross	Provision
	AED'000	AED'000	AED'000	AED'000
Not past due	80,809	27	612,951	
Past due 1 – 90 days	57,655	425	46,385	425
Past due 91 – 365 days	69,227	1,960	71,019	1,960

(c) Interest rate risk

The Group is exposed to interest rate risk on cash at bank, short-term bank borrowings and long-term bank loans (refer notes 18, 21 and 22). At the reporting date, the interest rate profile of the Group's interest bearing financial instruments was:

(i) Fixed rate instruments

	2017	2016
	AED'000	AED'000
Fixed rate instruments		
Cash at bank – in deposit accounts (refer note 18)	38,641	78,350

Sensitivity analysis for fixed rate instruments

The interest rates on cash at bank in deposit accounts is fixed and is not subject to change. The Group does not account for any fixed rate financial assets at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect the profit or loss.

(ii) Variable rate instruments

	2017	2016
	AED'000	AED'000
Variable rate instruments		
Short-term bank borrowings (refer note 21)	51,106	194,740
Long-term bank loans (refer note 22)	1,510,676	1,364,098

	1,561,782	1,558,838
	and that and that has been proportion	

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have increased/(decreased) equity and profit or loss by the amounts shown below. The analysis below excludes interest capitalised and assumes that all other variables remain constant.

	Profit o	or loss
	and e	equity
	100 bp	100 bp
	increase	decrease
	AED'000	AED'000
31 December 2017		
Variable rate instruments	(15,618)	15,618

31 December 2016		
Variable rate instruments	(15,588)	15,588
	====	

(d) Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Notes (continued)

31 Financial instruments (continued)

(d) Fair value hierarchy (continued)

The Group has other investments which are stated at fair value. Also refer to note 13.

31 December 2017	Level 1 AED'000	Level 3 AED'000	Total AED'000
Other investment	91,902	1,348	93,250
31 December 2016	******		
Other investment	170,908	2,491	173,399

There have been no reclassifications made during the current year or the previous year.

32 Significant estimates and judgements

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The following are the critical accounting estimates and judgements used by management in the preparation of these consolidated financial statements:

Going concern assumption

The Group's management has performed a preliminary assessment of the Group's ability to continue as a going concern, which covers a period of twelve months from the date of the consolidated financial statements, based on certain identified events and conditions that, individually or collectively, may cast doubt on the Group's ability to continue as going concern.

The Group's management has prepared its business forecast and the cash flow forecast for the twelve months from the reporting date on a conservative basis. The forecasts have been prepared taking into consideration the nature and condition of its business, the degree to which it is affected by external factors and other financial and non-financial data available at the time of preparation of such forecasts.

On the basis of such forecasts, the Group's management is of the opinion that the Group will be able to continue its operations for the next twelve months from the reporting date and that the going concern assumption used in the preparation of these consolidated financial statements is appropriate. The appropriateness of the going concern assumption shall be reassessed on each reporting date.

Revenue recognition for real estate properties

Revenue from sale of properties on freehold basis is recognised in the profit or loss when the significant risks and rewards of ownership are transferred to the buyer. Significant risks and rewards of ownership are deemed to be transferred to the buyer when the associated price risk is transferred to the buyer upon signing of the contract agreement and the buyer has been granted access to the property.

Notes (continued)

32 Significant estimates and judgements (continued)

Revenue recognition for contracting activities

Revenue from contracting activities is recognised in the profit or loss when the outcome of the contract can be reliably estimated. The Group generally starts recognising revenue when the outcome of the project can be reliably estimated. The measurement of contract revenue is based on the percentage of completion method and is affected by a variety of uncertainties that depend on the outcome of future events. The revenue from variations and claims in contract work is recognised only when it is probable to be recovered and value can be measured reliably. The estimates often need to be revised as events occur and uncertainties are resolved. Therefore, the amount of contract revenue may increase or decrease from period to period.

Impairment losses on property, plant and equipment and intangible assets

The Group reviews its property, plant and equipment and intangible assets to assess impairment, if there is an indication of impairment. In determining whether impairment losses should be recognised in the profit or loss, the Group makes judgements as to whether there is any observable data indicating that there is a reduction in the carrying value of property, plant and equipment or intangible assets. Accordingly, provision for impairment is made where there is an identified loss event or condition which, based on previous experience, is evidence of a reduction in the carrying value of property, plant and equipment or intangible assets.

Impairment losses on properties held for sale in inventory

The Group's management reviews the held for sale properties in inventory to assess impairment, if there is an indication of impairment. In determining whether impairment losses should be recognised in the profit or loss, the management assesses the current selling prices of the property units and the anticipated costs for completion of such property units for properties which remain unsold at the reporting date. If the current selling prices are lower than the anticipated total cost at completion, an impairment provision is recognised for the identified loss event or condition to reduce the cost of development properties to its net realisable value.

Estimated useful life and residual value of property, plant and equipment

The Group's management determines the estimated useful lives and related depreciation charge for its property, plant and equipment on an annual basis. The Group has carried out a review of the residual values and useful lives of property, plant and equipment as at 31 December 2017 and the management has not highlighted any requirement for an adjustment to the residual values and remaining useful lives of the assets for the current or future periods. However, these will be reviewed again in the next year.

Valuation of investment properties

The Group follows the fair value model under IAS 40 (revised 2003). Note 11 contain information about the valuation methodology adopted by the Group for the valuation of investment properties. Should the significant assumptions change, the fair value of investment properties could significantly impact the profit and loss and statement of financial position of the Group in the future.

Notes (continued)

32 Significant estimates and judgements (continued)

Provision for obsolete inventory

The Group reviews its inventory to assess loss on account of obsolescence on a regular basis. In determining whether provision for obsolescence should be recognised in the profit or loss, the Group makes judgements as to whether there is any observable data indicating that there is any future saleability of the product and the net realisable value for such product. Accordingly, provision for impairment is made where the net realisable value is less than cost based on best estimates by the management. The provision for obsolete inventory is based on the aging and past movement of the inventory.

Project work in progress

Project work in progress is stated at cost plus estimated profit after accounting for foreseeable losses, if any. In determining foreseeable losses, the Group's management estimate the outcome of each contract. The final result of the contact may differ from the estimate made at the time of preparation of these consolidated financial statements.

Provisions on receivables including related parties' receivables

The Group reviews its receivables to assess adequacy of provisions at least on an annual basis. The Group's credit risk is primarily attributable to its trade/contract and other receivables and amounts due from related parties. In determining whether provision should be recognised in the profit or loss, the Group makes judgements as to whether there is any observable data indicating that there is a reasonable measurable decrease in the estimated future cash flows. Accordingly, a provision is made where there is a potential loss event or condition which, based on previous experience, is evidence of a reduction in the recoverability of the cash flows.

Provision for warranty expenses

Provision for warranty expenses is recognised when the contract is completed and handed over to the customer for the period of warranty. The provision is based on historical warranty data and an assessment of all possible outcomes against their associated probabilities.

Provision against claim and contingent liabilities

The Group management on a regular basis carries out a detailed assessment of each claim and contingent liabilities that arise during the course of normal business and accordingly makes an assessment of the provision required to settle them. These detailed assessments are based on the past experience of the management in settling these claims and contingent liabilities on commercial terms, weighting of possible outcomes against their associated probabilities and availability of funds to settle them. Should the estimate significantly vary, the change will be accounted for as change in estimate and the consolidated financial statements would be significantly impacted in the future.

33 Comparative figures

Certain comparative figures have been reclassified or regrouped, wherever necessary, to conform to the presentation adopted in these consolidated financial statements. Such reclassifications do not affect the previously reported profit, net assets or equity of the Group.

Notes (continued)

34 Subsequent events

Sale of the Group's full stake in the joint venture

The Group has sold its 50% interest in Emirates District Cooling (Emicool) LLC to Dubai Investments PJSC on 18 January 2018 for a total consideration of AED 500 million.

Loan settlement

The Group has made a settlement amounting to AED 125 million against one of the term loans (refer note 22 (b) (vi)).

35 Social contributions

The Group have made donation of AED 20,000 as social contribution to Rashid Centre for Disabled during the current year.
